Subject: Tega Cay Water Service

Another 100,000 gallons **estimated** (amount spilled from 12 midnight until 9 AM) in the cove between Marquesas and Palmyra from the waste water treatment plant. This is the third spill from that site this year.

I live one block from this!!!

The water plant called me today and left a voice mail about the reason for the spill. They said there was a 3 ½ inch rainfall and massive amounts of water that were uncontrollable. How is it UNCONTROLLABLE? that is what they bill me over a 100 a month to take care of! Whatever the problem is, it HAS to be fixed. It scares me to let the girls swim in the lake if it keeps getting polluted!!
